INDEX FOR VOLUME 55

Articles

Bailey, R. A. & Gower, J. C. *Approximating a symmetric matrix*, 665–675.

Beder, Jay H. & Heim, Robert C. *On the use of ridit analysis*, 603–616.

Bedrick, Edward J. *On the large sample distributions of modified sample biserial correlation coefficients*. 217–228.

Bentler, P. M. (see Lee, Sik-Yum.)

Böckenholt, Ingo. (see Böckenholt, Ulf.)

Böckenholt, Ulf. *Multivariate Thurstonian models*. 391–403.

Böckenholt, Ulf & Böckenholt, Ingo. *Canonical analysis of contingency tables with linear constraints*, 633–639.

Browne, Michael W. (see Wothke, Werner.)

Burke, Raymond R. (see DeSarbo, Wayne S.)

Commandeur, Jacques J. F. (see Mooijaart, Ab.)

De Boeck, Paul (see Van Mechelen, Iven.)

de Leeuw, Jan. (see Kiers, Henk A. L.)

DeSarbo, Wayne S., Manrai, Ajay K., & Burke, Raymond R. *A nonspatial methodology for the analysis of two-way proximity data incorporating the distance-density hypothesis*. 229–253.

Dijkstra, T. K. *Some properties of estimated scale invariant covariance structures*. 327–336.

Fligner, Michael A. & Verducci, Joseph S. *Posterior probabilities for a consensus ordering*. 53–63.

Gardner, William. *Analyzing sequential categorical data: Individual variation in Markov chains*. 263–275.

Gehrlein, William V. *The expected likelihood of transitivity of preference*, 695–706.

Gower, J. C. (see Bailey, R. A.)

Gross, Alan L. *A maximum likelihood approach to test validation with missing and censored dependent variables*, 533–549.

Haertel, Edward H. *Continuous and discrete latent structure models for item response data*, 477–494.

Hakstian, A. Ralph. (see Schroeder, Marsha L.)

Heim, Robert C. (see Beder, Jay H.)

Hoijtink, Herbert. (see Molenaar, Ivo W.)

Hoijtink, Herbert. *A latent trait model for dichotomous choice data*, 641–656.

Holland, Paul W. *On the sampling theory foundations of item response theory models*, 577–601.

Holland, Paul W. *The Dutch indentity: A new tool for the study of item response models*. 5–18.

Holmes, D. J. *The robustness of the usual correction for restriction in range due to explicit selection*. 19–32.

Iacobucci, Dawn & Wasserman, Stanley. *Social networks with two sets of actors*, 707–720.

Jannarone, Robert J., Yu, Kai F., & Laughlin, James E. *Easy Bayes estimation for Rasch-type models*, 449–460.

Johnson, Jane C. (see Tsutakawa, Robert K.)

Kano, Yutaka. *Noniterative estimation and the choice of the number of factors in exploratory factor analysis*. 277–291.

Kiers, Henk A. L. *Majorization as a tool for optimizing a class of matrix functions*, 417–428.

Kiers, Henk A. L., ten Berge, Jos M. F., Takane, Yoshio, & de Leeuw, Jan. *A generalization of Takane's algorithm for DEDICOM*. 151–158.

Lattin, James M. *A minimum-cost network-flow solution to the case V Thurstone scaling problem*. 353–370.

Laughlin, James E. (see Jannarone, Robert J.)

Lee, Sik-Yum, Poon, Wai-Yin, & Bentler, P. M. *A three-stage estimation procedure for structural equation models with polytomous variables*. 45–51.

Manrai, Ajay K. (see DeSarbo, Wayne S.)

Meredith, William & Tisak, John. *Latent curve analysis*. 107–122.

Mishra, Sanjay. (see Umesh, U. N.)

Mislevy, Robert J. & Verhelst, Norman. *Modeling item responses when different subjects employ different solution strategies*. 195–215.

Molenaar, Ivo W. & Hoijtink, Herbert. *The many null distributions of person fit indices*. 75–106.

Mooijaart, Ab & Commandeur, Jacques J. F. *A general solution of the weighted orthonormal Procrustes problem*, 657–663.

Nicewander, W. Alan. *A latent-trait based reliability estimate and upper bound*. 65–74.

Otsu, Tatsuo & Saito, Takayuki. *The problem of local optimality with OSMOD*, 517–518.

Poole, Keith T. *Least squares metric, unidimensional scaling of multivariate linear models*. 123–149.

Poon, Wai-Yin (see Lee, Sik-Yum.)

Saito, Takayuki. (see Otsu, Tatsuo.)

Schroeder, Marsha L. & Hakstian, A. Ralph. *Inferential procedures for multifaceted coefficients of generalizability*, 429–447.

Schwarz, Wolfgang. (see Vorberg, Dirk.)

Sobel, Michael E. (see Stone, Clement A.)
Sobel, Michael E. *Effect analysis and causation in linear structural equation models*, 495–515.
Stocking, Martha L. *Specifying optimum examinees for item parameter estimation in item response theory*, 461–475.
Stone, Clement A. & Sobel, Michael E. *The robustness of estimates of total indirect effects in covariance structure models estimated by maximum likelihood*. 337–352.
Stout, Willaim F. *A new item response theory modeling approach with applications to unidimensionality assessment and ability estimation*. 293–325.
Takane, Yoshio. (see Kiers, Henk A. L.)
ten Berge, Jos M. F.. (see Kiers, Henk A. L.)
ter Braak, Cajo J. F. *Interpreting cannonical correlation analysis through biplots of structure correlations and weights*, 519–531.
Tisak, John. (see Meredith, William.)
Tsutakawa, Robert K. & Johnson, Jane C. *The effect of the uncertainty of item parameter estimation on ability estimates*. 371–390.
Umesh, U. N. & Mishra, Sanjay. *A Monte Carlo investigation of conjoint analysis index-of-fit: Goodness of fit, significance and power*. 33–44.
Van Mechelen, Iven & De Boeck, Paul. *Projection of a binary criterion into a model of hierarchical classes*, 667–694.
Verducci, Joseph S. (see Fligner, Michael A.)
Verhelst, Norman. (see Mislevy, Robert J.)
Vorberg, Dirk & Schwarz, Wolfgang. *Rasch-representable reaction time distributions*, 617–632.
Wasserman, Stanley. (see Iacobucci, Dawn.)
Wothke, Werner & Browne, Michael W. *The direct product model for the MTMM matrix parameterized as a second order factor analysis model*. 255–262.
Yu, Kai F. (see Jannarone, Robert J.)

Notes and Comments

Foerster, Friedrich & Stemmler, Gerhard. *When can we trust the F-approximation of the Box-test?*, 727–728.
Ichikawa, Masanori. (see Yanai, Haruo.)
Maiti, Sadhan Samar & Mukherjee, Bishwa Nath. *A note on distributional properties of the Jöreskog-Sörbom fit indices*, 721–726.
Mukherjee, Bishwa Nath. (see Maiti, Sadhan Samar.)
Stemmler, Gerhard. (see Foerster, Friedrich.)
Yanai, Haruo & Ichikawa, Masanori. *New lower and upper bounds for communality in factor analysis*. 405–409.

Computational Psychometrics

Collins, Linda M. (see Donoghue, John R.)
Donoghue, John R. & Collins, Linda M. *A note on the unbiased estimation of the intraclass correlation*. 159–164.
Ramsay, James O. *MATFIT: A FORTRAN subroutine for comparing two matrices in a subspace*, 551–553.

Computing Announcements

Blair, R. Clifford. (see Sawilowsky, Shlomo S.)
Cohen, Jacob. *SETCOR: Set correlation analysis*. 165–166.
Micceri, Theordore. (Sawilowsky, Shlomo S.)
Sawilowsky, Shlomo S., Blair, R. Clifford., & Micceri, Theordore. *A PC FORTRAN subroutine library of psychology and education data sets*. 729.

Reviews

d'Aubigny, Gérard. Review of *Multidimensional Scaling: History, Theory, and Applications* by Forrest W. Young. 184–188.
Gittins, Robert. Review of *Eigenvalue Techniques for Qualitative Data* by Abby Israëls. 177–181.
Krackhardt, David. Review of *Assignment Methods in Combinatorial Data Analysis* by Lawrence Hubert. 555–558.
Kroonenberg, Pieter M. Review of *Multidimensional Similarity Structure Analysis* by I. Borg and J. Longoes. 169–172.
Morin, Anne M. Review of *Mixture Models: Inference and Applications to Clustering* by Geoffroy J. McLachlan and Kaye E. Basford. 167–168.
Steiger, James H. Review of *Introduction to Linear Multivariate Data Analysis. Volumes 1 and 2* by J. P. van de Geer. 173–174.

Thomas, Hoben. Review of *Statistical Methods for Meta-Analysis* by L. U. Hedges and I. Olkin. 559–563.
van der Pligt, Joop & van Schie, Els C. M. Review of *Judgment Studies: Design, Analysis, and Meta-Analysis* by Robert Rosenthal. 175–176.
van Schie, Els C. M. (see van der Pligt, Joop.)
Visser, Ron. Review of *Robust Regression and Outlier Detection* by Peter J. Rousseeuw and Annick M. Leroy. 182–183.

Errata

Huynh, Huynh. *Some approximate tests for repeated measurement designs*. 189.
